DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 21-26 and 28-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over MacFarland in view of Rose ('236).

MacFarland discloses the use of a stringed musical instrument(10) comprising a body(12), a neck (16) extending outwardly from the body, a head(20) located opposite the body on the neck, at least one string extending from the body to the head, the string having a first end and a second end, means on the head for supporting and forming first critical point for the string(nut 18), means (bridge 22) on the body for supporting a forming a second critical point for the string, the first end secured to the head (see figure 1) and the second end secured to the body wherein the stringed musical instrument includes an adjustment device (22) comprising a means for bringing the string to proper playing pitch in at least one tuning quickly and a separate means whereby the string is further tuned at the proper playing pitch. MacFarland also discloses the use of a pivoting an anchor(60) for tensioning the string to be tuned and a means for locking the adjustment device (see column 4, lines 65-69). MacFarland

further discloses the use of a tuner(110) that comprises a thumbscrew. MacFarland further discloses the use of an L shaped elongated lever(62) and a tremolo.

MacFarland does not specifically disclose the use of a tuning adjustment device comprising a means for bringing at least string proper playing pitch from an untensioned conditioned at least one pitch tuning quickly.

Rose discloses that the use of a tuning adjustment device comprising a means for bringing at least string proper playing pitch from an untensioned conditioned at least one pitch tuning quickly is well known in the art (column 6, lines 6-20).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device as disclosed by MacFarland with the tensioning means as disclosed by Rose in order to maintain the harmonic tuning of the musical instrument.

3. Claim 27 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and if no other pertinent art is found.

3. Applicant's arguments with respect to claims 21-26 and 28-46 have been considered but are moot in view of the new ground(s) of rejection.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

5. Any inquiry of a **general nature or relating to the status of this application or filed papers** should be directed to the **Group receptionist whose telephone number is (703) 308-0956**.
